

The New Industry Standard

Lock Saver[®] super-lubricates lock mechanisms and leaves parts clean and corrosion-resistant. Since its introduction to the security hardware industry in 2005, Lock Saver[®] has quickly become the new standard of excellence for lock maintenance - especially effective in harsh climates and extreme temperature environments. Lock Saver[®] also eliminates galvanic corrosion in those areas where dissimilar metals come into contact with each other.

Grease Syringe 0.5oz

60381
Grease Jar 8oz

60441
Cleaner in Pump Spray 4oz

60601
Synthetic Lubricant 12.65 fl oz

- Delivers long lasting lubrication and corrosion protection
- Saves money by reducing time and frequency of maintenance events
- Will not freeze, gum up, dry out or absorb water
- Keeps locks from freezing, frees frozen locks
- Effective temperature range: -65°F to +450°F
- Will not clog or compromise performance between closely fitted parts
- For all metal and composite surfaces
- Generally harmless to wood, rubber, plastic or composite parts
- Non-toxic, environmentally safe
